

MODULE 3

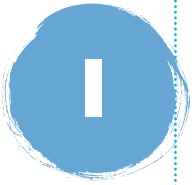

**IMCI, IYCF, AND
CARE FOR CHILD
DEVELOPMENT**

existing WHO and UNICEF material

DRAFT

INTRODUCTION

A number of training materials on topics important to the work of home visitors, such as *Integrated Management of Childhood Illnesses (IMCI)*, *Infant and Young Child Feeding (IYCF)*, and *Care for Child Development* are available from WHO, UNICEF and other agencies. Many have been adapted for the training of health workers at the country level.

A deliberate decision was made by the Young Child Wellbeing Team at the UNICEF Regional Office for CEE/CIS to prioritize comprehensive early childhood development content and related topics. The latter are not commonly found in the pre- and in-service training of home visitors, but are essential for the new and more comprehensive role of home visitors in more comprehensively supporting families and the wellbeing, health, and development of young children.
